Maher Kreydieh

Software Developer

+961 78 891 758 ◇ maher.kreydieh@gmail.com ◇ Beirut, Lebanon ◇ LinkedIn

SUMMARY

Software developer with a BSc in Computer Science and a background in technical support and operations. Built Akletna, a full-stack meal-planning app (Flutter, Java 21 / Spring Boot, PostgreSQL) with JWT authentication, REST APIs and a relational data model. Skilled in debugging, data validation and turning user problems into clear technical work. Comfortable with an AI-assisted workflow (Claude Code, Codex) while reviewing, testing and owning the code. Seeking a junior software developer role in Beirut or remote.

SKILLS

Programming Languages Java, Dart, Python, JavaScript, C# (.NET),
SQL **Web Technologies** HTML5, CSS3, JavaScript (ES6+)
Frameworks & MobileFlutter, Spring Boot, Spring Security (JWT), REST APIs, JPA / Hibernate
Database PostgreSQL, SQL (relational databases, querying, data management)
Computer Science Fundamentals Artificial Intelligence (basics), Operating Systems, Computer Networks
Tools & Platforms Git, Claude Code & Codex (AI-assisted development), Microsoft Office Suite, CRM Systems, Microsoft 365
Soft Skills Problem-solving, attention to detail, cross-team communication, multitasking
Spoken Languages Arabic (native), English (fluent), French (fluent)

EXPERIENCE

Operations Agent Oct '23 — Present
TLS Contact Beirut, Lebanon

- Process and manage sensitive visa application data and documents with full compliance with data protection and security regulations.
- Collect and verify biometric data, ensuring accuracy and adherence to government security protocols.
- Maintain detailed digital and physical records, applying data integrity practices consistent with software QA standards.
- Identify and resolve procedural errors, coordinating with internal teams and external government authorities.
- Operate cashier and POS systems, processing and reconciling daily financial transactions.

Technical Support Specialist May '22 — Aug '23 Much Better Istanbul, Turkey

- Investigated and resolved customer-reported software issues, documenting bugs and escalating to development
- teams.
- Reviewed and validated client data and transaction records, detecting errors and suspicious activities.
- Acted as liaison between end users and developers, translating technical problems into clear, actionable reports.

Monitored platform activity in real time, ensuring data accuracy and platform reliability.

Call Center Representative Jul '21 — Mar '22
Global Turkey Clinic Istanbul, Turkey

- Handled 90+ customer interactions daily, logging all data accurately into CRM systems and submitting daily reports.
- Followed up with clients end-to-end to ensure full satisfaction and resolve outstanding issues.

PROJECTS

/

Akletna — Lebanese Meal-Planning App (Graduation Project) **2026**
Flutter · Dart · Java 21 · Spring Boot · PostgreSQL github.com/maherkreydieh/akletna-mvp

- Built a Flutter mobile app and a Spring Boot REST API for recipe discovery, pantry matching, weekly meal plans and automatic grocery lists.
- Designed a PostgreSQL data model (32 tables) using JPA / Hibernate, with schema validation to protect production data.
- Implemented backend-authoritative authentication with Spring Security and JWT; users can only edit their own profiles and recipes.
- Added nutrition estimates from reviewed ingredient data, clearly showing uncertainty when data is incomplete.
- Used an AI-assisted workflow (Claude Code, Codex) to plan features, then reviewed every change and tested flows on an Android emulator.

EDUCATION

Sep '23 — Jun '26

Bachelor of Science in Computer Science, Arab Open University

Beirut, Lebanon

- Relevant coursework: Data Structures, Algorithms, Object-Oriented Programming, Database Systems, Web Development, Software Engineering, Artificial Intelligence, Operating Systems, Computer Networks.

'19

High School Diploma in General Science, Daughters of Charity School

Beirut
